Zehnder Zenia

Ultimate comfort heating in
your bathroom.

Perfect integration into modern
bathroom architecture

Zehnder Zenia

Ultimate comfort heating in your bathroom.

Zehnder Zenia is a towel warmer, towel dryer, infrared radiator and boost heater in one – a completely innovative and revolutionary thermal comfort unit that perfectly blends into modern bathroom architecture thanks to its minimalist design.

Snuggly warm towels

Love wrapping yourself in a warm, soft towel after showering? Zehnder Zenia gives you this feeling of wellness – press a button and your warmed towel is ready just a few minutes later.

Feel-good heat at the touch of a button

With efficient infrared radiant heat that's extremely pleasant, Zehnder Zenia ensures that unique added extra in comfort heating. Thanks to the connectible boost heater with a thermal output of 1,000 W, the room temperature can be increased by several degrees centigrade within a few minutes.

Quick, convenient and hygienic towel drying

The faster a towel is able to dry, the less chance there is of bacteria growing on it. That's why Zehnder Zenia also includes a function for drying towels – quickly, hygienically and in a way that is gentle on fabrics.

A tidier bathroom

There is ample space for two large shower/bath towels inside Zehnder Zenia, which also makes it a discreet place to store the ones you are currently using.

Intuitive operation via control panel

The Zehnder Zenia control panel is ergonomically positioned at a convenient height on the front of the unit. Four touch sensors with distinct symbols provide quick access to key basic functions.

Individual adjustment and control via the app

With features such as time-controlled heating and drying programmes, Zehnder Zenia can be remotely controlled and individually adjusted using the app for iOS and Android.

Aesthetically appealing
storage of two large
shower/bath towels

**When it comes to achieving a comfortable indoor climate,
the bathroom is the most complex room in the house.**

We feel a natural need for the bathroom to be warmer than the rest of our homes while we are in there – for the simple reason that we are often unclothed. Many people also dream of a solution that allows them to warm their towels before using them and dry them afterwards – quickly, hygienically and in a way that is gentle on fabrics. Traditional heating systems can only meet some of these requirements, or provide an extremely inefficient solution.

**Introducing Zehnder Zenia – designed for ultimate
comfort heating in your bathroom.**

Colours and designs

Zehnder Zenia is available in classic white and sophisticated black, making it the perfect complement to the contemporary colour schemes produced by major bathroom ceramics manufacturers. An outer case for on-wall installation is available in addition to an in-wall installation option. A 230 V mains power supply is all you need.
